[SPNHC Resources Display](#)

Canadian Resources Display

Shipping specifications

The display is packed in a blue plastic case on wheels (39L x 33W x 10H inches) weighing approximately 65 pounds. Despite its weight the case can be moved about easily on wheels. Shipping arrangements are made in consultation with the SPNHC representative. Shipping costs and times will vary depending on the destination and amount of time allowed. Check with your local shipper for specific costs and shipping. Because the girth of the case exceeds Canada Post requirements it **cannot** be shipped via Canada Post. Ground courier is recommended.

Packing/Unpacking Instructions

Detailed instructions are included in the case to assist the borrower with unpacking the display when it arrives and packing it for shipping.

Setting up the Display

The display consists of a folding 3-part vertical panel with museum supplies and labels attached by velcro to the panels. Each panel or viewing area is approximately 44 high x 23 inches wide. Additional materials (binders, books, handouts) are arranged in front of the panels. A standard 8 foot by 36 inch table is required. As the display is viewed from one side only, it may be placed against a wall.
